

Notice to all Customers and suppliers of ODS Business Services Ltd

1st December 2006

ODS Business Services is moving premises from Frankland Road to The Spectrum Building, Westlea, Swindon on the 11th December 2006

ODS has recently won a complete pan European Supply Chain contract with a major Hollywood Studio. See other Press release for details.

In order to service the UK distribution requirements for this contract, and the future needs of our existing clients, ODS Business Services has decided to relocate to a new 311,000 sq ft premises.

From this new premises, designed by Norman Foster, ODS will house all its UK operations, from Authoring & Design, Mastering, Optical Disc Manufacturing, Fulfilment and Packing, to Full Service Distribution.

Our business model will only improve as full service distribution becomes one of our key offerings amongst the many services that ODS already offer.

During this move there should not be any disruption to your current production with ODS. We will be utilising additional lines available to us from ODS GmbH whilst local replication lines are de-commissioned and re-installed at the new ODS premises. The same applies to printing, we are adding new Screen, Offset/Litho and Digital Printing lines to our current printing facilities. Mastering, Packing and fulfilment will be uninterrupted and we expect lead times to be no different to your business over this period.

ODS will be employing a further 150 people over the next 3 to 6 months to man and manage the Full Service Distribution site, taking its total headcount to approximately 300.

I look forward to updating you on the further progress of the Full Distribution Service which we are committed to completing by the end of June 2007.

Up until then all our current services as of today remain unchanged.

We thank you for your continued custom and support and look forward to offering you an even greater service throughout 2007.

Yours sincerely,

**Ray Wheeler
Managing Director**

About ODS Optical Disc Service
